

REMOTE MACHINING FOR LASER CUTTING APPLICATIONS

RAJA MOHD SALLEH BIN RAJA BAHTIAR

A report submitted in partial fulfilment of the requirements
for the award of the degree of
Bachelor of Mechanical Engineering

**Faculty of Mechanical Engineering
UNIVERSITI MALAYSIA PAHANG**

PERPUSTAKAAN UNIVERSITI MALAYSIA PAHANG	
No. Perolahan 038780	No. Panggilan TJ
Tarikh 22 JUL 2009	1189 'S25 2008 IS BC.

NOVEMBER 2008

SUPERVISOR'S DECLARATION

We hereby declare that we have checked this project and in our opinion this project is satisfactory in terms of scope and quality for the award of the degree of Bachelor of Mechanical Engineering.

Signature : 
Name of Supervisor : ASSOC. PROF. DR WAN AZHAR BIN WAN YUSOFF
Position : DEPUTY DEAN OF FACULTY OF MANUFACTURING
ENGINEERING AND TECHNOLOGY MANAGEMENT
Date : 6 NOVEMBER 2008

Signature : 
Name of Panel : MOHD FADZIL FAISAE AB. RASHID
Position : LECTURER
Date : 6 NOVEMBER 2008

STUDENT'S DECLARATION

I hereby declare that the work in this thesis is my own except for quotations and summaries which have been duly acknowledged. The thesis has not been accepted for any degree and is not concurrently submitted for award of other degree.

Name : RAJA MOHD SALLEH BIN RAJA BAHTIAR

ID Number : MA05011

Date : 6 NOVEMBER 2008

**I dedicate this project to my loving mother, Aishah Lin bt Abdullah and my late
father, Raja Bahtiar bin Raja Safran**

**“Isn’t it astonishing that all these secrets have been preserved for so many years
just so we could discover them!”**

Orville Wright

ACKNOWLEDGMENTS

In the name of Allah S.W.T The Most Gracious, The Most Merciful, WHO gives me opportunities to breathe and to make this project, becomes success.

Acknowledge is what people do to show gratitude towards those around him or her that has supported the work done by that person. I am one who would like to acknowledge those who had been part of the ingredients that made this project successful. First and foremost I would like to thank my project supervisor, Associate Professor Dr. Wan Azhar bin Wan Yusoff for his outstanding ideas, guidance, and encouragement through the period of this project. I cannot thank him enough because the knowledge he had brought to me is invaluable and his patience in tolerating my naivety and constant mistakes. I also would like to thank my co-supervisor, Mr. Ahmad Fakhri Bin Ab. Nasir for guiding me and giving me brilliant suggestions that influenced the success of this project.

Family is one that I can never thank enough for supporting me. The first person who I would like to acknowledge although a bit too late is my late father, Mr. Raja Bahtiar bin Raja Safran. His constant advice and guidance has made me who I am today and without his guidance I can never be in the position I am now. The unconditional love and support given by my mother, Madam Aishah Lin bt Abdullah which I can never thank enough in words. Bless her for everything she has done for me for I am truly grateful to be her son. My younger brother and sister too I would like to thank for their words of encouragement and full support.

I heard this once from a person that peers are essential in life achievements and I totally agree with that statement. My peers thought me valuable lessons in life and those lessons helped me achieve my goals. I truly am grateful to everyone who has supported me all this while. Who am I if it were not for them? Thank You!

CHAPTER 1 INTRODUCTION

1.1	Project Motivation	1
1.2	Project Background	2
1.3	Project Problem Statement	3
1.4	Project Objectives	4
1.5	Project Scopes	4

CHAPTER 2 LITERATURE REVIEW

2.1	Introduction	5
2.2	Remote Machining	5
2.3	Advantages Of Remote Machining	7
2.4	Methods Of Applying Remote Machining	8
2.5	Previous Projects Or Researches	11
2.5.1	Remote Machining Applied To Milling Machine	11

2.5.2	Teleoperation By Using CNC Turning Machine	13
2.5.3	Teleoperation For Manure Spreader	15
2.5.4	Remote Machine For Finite Element Analysis	16
2.5.5	Remote Machine Online Monitoring System	18
2.6	Summary	19

CHAPTER 3 METHODOLOGY

3.1	Introduction	20
3.2	Conceptual Study	21
3.3	Conceptual Design	21
	3.3.1 Control Transfer Protocol	21
	3.3.2 User Interface Program	21
	3.3.3 IP Camera System	22
3.4	Overall Methodology Process	22
3.5	Web Camera System	23
	3.5.1 Web Camera Ability	23
	3.5.2 Remote Monitoring	23
3.6	Remote Machining Program	24
	3.6.1 Remote Server	26
	3.6.2 Remote Client	27
	3.6.3 Machine Control	28
3.7	Testing of Remote Machine and Camera System	29
3.8	Summary	31

CHAPTER 4 RESULTS AND DISCUSSIONS

4.1	Introduction	32
4.2	Compilation Of Program	33
4.3	Connection Between Server And Client	33
	4.3.1 Client Of Same Version	34
	4.3.2 Client Of Same Internet Protocol Address	34
4.4	Data Transfer	36

4.4.1	Converting String To Integer	36
4.5	Machine Control	37
4.5.1	Error in Program	37
4.5.2	Solution	39
4.6	Summary	40

CHAPTER 5 CONCLUSION

5.1	Conclusions	41
5.2	Recommendations	42
